NATIONAL ENGINEERING MANUAL (NEM)
210-ENG
Illinois Supplement 33, Part 505 (Subparts B and E)

SUBJECT: ENG – Updates to Illinois Supplements to the National Engineering Manual.

Purpose. To announce updated supplement to the NEM on Non-NRCS engineering.

Effective Date. This supplement is effective upon receipt.

Explanation. NEM Supplement IL33 updates Illinois policy on non-NRCS engineering in Part 505. The major change is to clarify the requirement to use the latest version of ASCE 7 for the design of roof structures, and to clarify that the licensed engineer is responsible for determining whether the work is within the scope of his/her license (Professional Engineer or Structural Engineer.) Minor editorial changes were also made throughout the supplement to comply with the Plain Language Act.

The Illinois NRCS engineering website will be updated to include the new Illinois supplement at http://www.il.nrcs.usda.gov/technical/engineer/eng_index.html. These supplements will also be posted to the NRCS eDirectives website at <http://directives.sc.egov.usda.gov/>.

Supplement IL33 supersedes the part of Amendment IL31 dated September 2012 related to Part 505.

Filing Instructions. If a hardcopy of Illinois supplements to NEM is maintained, holders should:

- discard existing pages IL505-B.1 through IL505-B.5 and IL505-E.1 through IL505-E.11;
- print the attached amendments on green paper;
- insert new pages IL505-B.1 through IL505-B.5 and IL505-E.1 through IL505-E.11 in front of Part 505 of the NEM.

Any questions on this supplement should be directed to the Area Engineer.

ERIC A. GERTH
Acting State Conservationist
